IEEE's Accelerated OA Program

Announcing the Editor-in-Chief of the New IEEE Open Journal of Signal Processing: Prof. Mari Ostendorf

OJSP Featured Articles

Mari Ostendorf

The IEEE Signal Processing Society (SPS) is proud to announce that Prof. Mari Ostendorf has accepted the position of Editor-in-Chief (EIC) of the new IEEE Open Journal of Signal Processing (OJ-SP) - a gold, fully open access journal dedicated to publishing peer-reviewed articles on the latest topics and trends in Signal Processing (SP). IEEE OJ-SP covers the enabling technology for the generation, transformation, extraction, and interpretation of information. It comprises the theory, algorithms with associated architectures and implementations, and applications related to processing information contained in many different formats broadly designated as signals. Signal Processing uses mathematical, statistical, computational, heuristic, and/or linguistic representations, formalisms, modeling techniques and algorithms for generating, transforming, transmitting, and learning from signals.

Plan S compliance

All of IEEE's new fully Gold OA journals, existing OA journals, and IEEE Access

Plan S Requirements

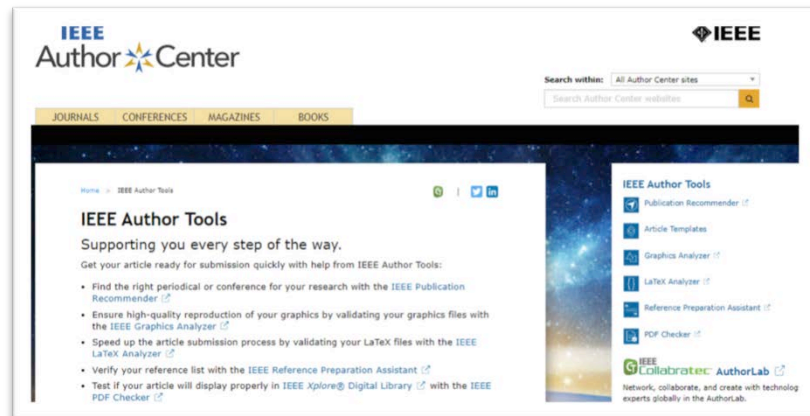

- All publications must be published under an open license, preferably the Creative Commons Attribution license (CC BY)
- When Open Access publication fees are applied, they must be commensurate with the publication services delivered
- The journal/platform must provide, on its website, a detailed description of its editorial policies and decision-making processes.
- No reliance on hybrid journals (subscription journals with a Gold OA option) or mirror journals (OA journals using essentially the same or similar Editorial Boards as the subscription journal)
- Use of persistent identifiers (PIDs) for scholarly publications, such as DOI
- Deposition of content with a long-term digital preservation or archiving program
- High-quality article level metadata in standard interoperable non-proprietary format
